## Data Access - Use Statement

<b>Confidentiality Declaration</b>
IPUMS-International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved.
To gain access to the data, a researcher must agree to the following:
(1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS-International agreements with collaborating agencies, redistribution of the data to third parties is prohibited.
(2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture.
(3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited.
(4) Report all publications based on these data to IPUMS-International, which will in turn pass the information on to the relevant national statistical agencies.
Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating

the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes.

These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data.

IPUMS-International works with each country's statistical office to minimize the risk of disclosure of respondent information. The details of the confidentiality protections vary across countries, but in all cases, names and detailed geographic information are suppressed and top-codes are imposed on variables such as income that might identify specific persons. In addition, IPUMS-International uses a variety of technical procedures to enhance confidentiality protection. These include the following:

- (1) Swapping an undisclosed fraction of records from one administrative district to another to make positive identification of individuals impossible.
- (2) Randomizing the placement of households within districts to disguise the order in which individuals were enumerated or the data processed.
- (3) Aggregating codes of sensitive characteristics (e.g., grouping together very small ethnic categories)
- (4) Top- and bottom-coding continuous variables to prevent identification of extreme cases.

The safety record for public-use census microdata is apparently perfect. In almost four decades of use, there has not been a single verified breach of statistical confidentiality. The measures implemented by the IPUMS-International are designed to extend this record.

#### Citation Requirement

Minnesota Population Center. Integrated Public Use Microdata Series, International: Version 7.3 [dataset]. Minneapolis, MN: IPUMS, 2020. <https://doi.org/10.18128/D020.V7.3>

Researchers should also acknowledge the statistical agency that originally produced the data.

The licensing agreement for use of IPUMS-International data requires that users supply IPUMS-International with the title and full citation for any publications, research reports, or educational materials making use of the data or documentation.

Copies of such materials are also gratefully received at [ipums@umn.edu](mailto:ipums@umn.edu).

Printed matter should be sent to:

IPUMS-International

225 19th Avenue South  
Minneapolis, MN 55455

#### Conditions

An adapted version of the dataset, harmonized for international comparability, is available from IPUMS-International (<https://international.ipums.org/international/>) under the following conditions:

IPUMS-International distributes integrated microdata of individuals and households only by agreement of collaborating national statistical offices and under the strictest of confidence. Before data may be distributed to an individual researcher, an electronic license agreement must be signed and approved. To gain access to the data, a researcher must agree to the

following:

- (1) Implement security measures to prevent unauthorized access to census microdata. Under IPUMS-International agreements with collaborating agencies, redistribution of the data to third parties is prohibited.
- (2) Use the microdata for the exclusive purposes of scholarly research and education. Researchers must explicitly agree to not use microdata acquired for any commercial or income-generating venture.
- (3) Maintain the confidentiality of persons, households, and other entities. Any attempt to ascertain the identity of persons or households from the microdata is prohibited. Alleging that a person or household has been identified is also prohibited.
- (4) Report all publications based on these data to IPUMS-International, which will in turn pass the information on to the relevant national statistical agencies.

Once a project is approved, a password is issued and data may be acquired through the Internet. Penalties for violating the license include: revocation of the license, recall of all microdata acquired, filing of a motion of censure to the appropriate professional organizations, and civil prosecution under the relevant national or international statutes.

These safeguards mirror the principles from the Joint ECE/Eurostat Work Session on Statistical Data Confidentiality. Employees of the Minnesota Population Center who work with the census microdata to produce the harmonized database also sign agreements to respect the confidentiality of the data.

#### **Disclaimer**

The user of the data acknowledges that the original collector of the data, the authorized distributor of the data, and the relevant funding agency bear no responsibility for use of the data or for interpretations or inferences based upon such uses.

### Variable: "SERIAL"

Name:	SERIAL
Label:	Household serial number
Variable Text:	<p>SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.</p> <p>SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:</p> <p>Chile 1970, 1992, 2002 Colombia 1993, 2005 Costa Rica 1984, 2000 Cuba 2002 Dominican Republic 1981, 2002, 2010 Ecuador 1990, 2001 Germany 1971 Hungary 1980, 1990, 2001 Jamaica 1982, 1991, 2001 Malaysia 1970, 1991, 2000 Mexico 1995, 1990, 2000, 2005 Nigeria 2006 Panama 2000 Peru 1993, 2007 Portugal 1981, 1991, 2001 Spain 1991 Uruguay 2011 Venezuela 1990, 2001 Vietnam 1989 In all other samples, the last 3 digits are always zeroes.</p> <p>SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.</p>

	The U.S. 1900 sample and 1880 10% sample have multi-household dwellings that can be identified using the last 3 digits of SERIAL.
Concept:	Technical Household Variables -- HOUSEHOLD
Start Position:	17
End Position:	28
Width:	12
Variable Format:	numeric
Implied Decimal Places:	0
Coder Instructions:	<p>SERIAL is a 10-digit numeric variable.</p> <p>The last 3 digits of SERIAL indicate household number within dwelling for selected samples noted in the variable description. In all other samples, the last 3 digits are always zeroes.</p>

### Variable: "PERSONS"

Name:	PERSONS
Label:	Number of person records in the household
Variable Text:	PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.
Concept:	Technical Household Variables -- HOUSEHOLD
Start Position:	29
End Position:	32
Width:	4
Variable Format:	numeric
Implied Decimal Places:	0
Coder Instructions:	PERSONS is a 4-digit numeric variable.

### Variable: "HHWT"

Name:	HHWT
Label:	Household weight
Variable Text:	<p>HHWT indicates the number of households in the population represented by the household in the sample.</p> <p>For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.</p> <p>NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.</p>
Concept:	Technical Household Variables -- HOUSEHOLD
Start Position:	33
End Position:	40
Width:	8
Variable Format:	numeric
Implied Decimal Places:	2
Coder Instructions:	HHWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

### Variable: "SUBSAMP"

Name:	SUBSAMP
Label:	Subsample number
Variable Text:	<p>SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.</p>
Concept:	Technical Household Variables -- HOUSEHOLD

### Variable: "GQ"

Name:	GQ
Label:	Group quarters (collective dwelling) status
Variable Text:	<p>GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.</p> <p>Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.</p> <p>Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.</p>

### Variable: "GQTYPE"

Name:	GQTYPE
Label:	Group quarters type
Variable Text:	<p>GQTYPE identifies the type of group quarters -- collective dwellings -- which are broadly classified into institutional and non-institutional types.</p> <p>Institutions are a place of residence where people are subject to a common authority or bound by a common objective or personal interest. The definition encompasses correctional facilities, health institutions, retirement homes, orphanages, shelters (social welfare institutions), military or police establishments, boarding schools, and religious group dwellings.</p> <p>Non-institutional group quarters comprise refugee and workers' camps (temporary accommodation), hotels, pensions, and all types of boarding or lodging houses. The "floating population" is included as a category within the non-institutional group quarters, when identified by the corresponding sample. This group refers to outdoor sleepers, homeless persons, travelers, and persons in ships, boats, or other mobile dwellings.</p> <p>A more general classification of households between private and group quarters is available in GQ.</p>

### Variable: "GEO2ALT\_CL"

Name:	GEO2ALT_CL
Label:	Chile, Department 1960 - 1970 [Level 2; consistent boundaries, GIS]
Variable Text:	<p>GEO2ALT_CL identifies the household's department within Chile in 1960 and 1970. Departments are the second level administrative units of the country, after provinces. GEO2ALT_CL is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO2ALT_CL can be downloaded from the GIS Boundary files page in the IPUMS International web site.</p> <p>The full set of geography variables for Chile can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found <a href="#">here</a>.</p>

**Variable: "GEO2\_CL1992"**

Name:	GEO2_CL1992
-------	-------------

Label:	Chile, Municipality 1992 [Level 2, GIS]
Variable Text:	<p>GEO2_CL1992 identifies the household's municipality within Chile in 1992. Municipalities are the second level administrative units of the country, after provinces. A GIS map (in shapefile format), corresponding to GEO2_CL1992 can be downloaded from the GIS Boundary files page in the IPUMS International web site</p> <p>The full set of geography variables for Chile can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level of any country refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.</p>

**Variable: "REGNCL"**

Name:	REGNCL
Label:	Chile, Regions [GIS]
Variable Text:	REGNCL indicates the region in Chile in which the household was enumerated. It is the largest-scale geographic identifier available in the Chile samples.  The full set of geography variables for Chile can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1 and GEOLEV2. More information on IPUMS-International geography can be found here.

## Variable: "OWNERSHIP"

Name:	OWNERSHIP
Label:	Ownership of dwelling [general version]
Variable Text:	OWNERSHIP indicates whether a member of the household owned the housing unit. Households that acquired their unit with a mortgage or other lending arrangement were understood to "own" their unit even if they had not yet completed repayment. For those that did not own their housing unit, several options were possible: renting (from various types of owners), subletting, usufruct, and de facto occupation.

Value	Label
00	Vacant household
01	One-person household
02	Married/cohab couple, no children
03	Married/cohab couple with children
04	Single-parent family
05	Polygamous family
06	Extended family, relatives only
07	Composite household, family and non-relatives
08	Non-family household
09	Unclassified subfamily
10	Other relative or non-relative household
11	Group quarters
99	Unclassifiable

### Variable: "NFAMS"

Name:	NFAMS
Label:	Number of families in household
Variable Text:	<p>NFAMS is a constructed variable that indicates the number of families within each household. Family membership is defined by FAMUNIT. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and a domestic employee contains two families; a household consisting of a large, multi-generation extended family with no persons unrelated to the head counts as a single family.</p> <p>NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.</p>

9	9 or more fathers in household

### Variable: "HEADLOC"

Name:	HEADLOC
Label:	Head's location in household
Variable Text:	HEADLOC gives the person number (PERNUM) of the head of household in samples in which persons are organized into households.
Concept:	Constructed Household Variables -- HOUSEHOLD
Start Position:	211
End Position:	213
Width:	3
Variable Format:	numeric
Implied Decimal Places:	0
Coder Instructions:	HEADLOC is a 3-digit numeric variable.

**Variable: "PERNUM"**

Name:	PERNUM
Label:	Person number
Variable Text:	PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.
Concept:	Technical Person Variables -- PERSON
Start Position:	214
End Position:	217
Width:	4
Variable Format:	numeric
Implied Decimal Places:	0
Coder Instructions:	PERNUM is a 4-digit numeric variable.

**Variable: "PERWT"**

Name:	PERWT
Label:	Person weight
Variable Text:	<p>PERWT indicates the number of persons in the actual population represented by the person in the sample.</p> <p>For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.</p> <p>NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.</p>
Concept:	Technical Person Variables -- PERSON
Start Position:	218
End Position:	225
Width:	8
Variable Format:	numeric

Implied Decimal Places:	2
Coder Instructions:	PERWT is an 8-digit numeric variable with 2 implied decimal places. See the variable description.

## Variable: "FAMSIZE"

Name:	FAMSIZE
Label:	Number of own family members in household
Variable Text:	<p>FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.</p> <p>FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).</p>
Concept:	Constructed Family Interrelationship Variables -- PERSON
Start Position:	226
End Position:	229
Width:	4
Variable Format:	numeric
Implied Decimal Places:	0

**Variable: "EDATTAIN"**

Name:	EDATTAIN						
Label:	Educational attainment, international recode [general version]						
Variable Text:	<p>EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.</p> <p>EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.</p> <p>Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.</p>

### Variable: "YRSCHOOL"

Name:	YRSCHOOL
Label:	Years of schooling
Variable Text:	<p>YRSCHOOL indicates the highest grade/level of schooling the person had completed, in years. Only formal schooling is counted. YRSCHOOL accounts for the number of years of study, regardless of the track or kind of study. Information on degree and/or technical track is available in EDATTAIN. Years of schooling for Israel, categorized into intervals, are given in YRSCHOOL2.</p> <p>Users should pay close attention to the top-codes in each sample, as discussed in the comparability section.</p>

99998	Response suppressed
99999	Unknown

**Variable: "GEOMIG1\_5"**

Name:	GEOMIG1_5												
Label:	1st subnational geographic level of residence 5 years prior to survey, world [consistent boundaries over time]												
Variable Text:	GEOMIG1_5 indicates the major administrative unit in which the person resided five years prior to the survey. Only intra-national migrations are recorded; however, the variable incorporates geographies for every country that lists place of residence five years ago, to enable comparative analysis of subnational migration. Foreign migrants are coded 097 or 997. Codes for GEOMIG1_5 match the geographic codes in GEOLEV1 (current place of residence). For similar information for different time intervals since migration, see variables GEOMIG1_P, GEOMIG1_1, and GEOMIG1_10. More on migration and geography can be found here.												
Concept:	Migration: Global Variables -- PERSON												
Start Position:	281												
End Position:	286												
Width:	6												
Variable Format:	numeric												
Implied Decimal Places:	0
